Overview

Acolyte Academy is a gamification learning platform.

Whatever the subject, you can use Acolyte Academy to help you learn it. You can make exams (also known as tests) with questions and answers that you want and then take the exam to challenge yourself.

Getting questions correct will help you earn mastery of your subject, which you can level up through as you keep taking the exams.

If you get the same questions wrong then those are the questions that you will see the most often.

You can also add any of the questions that you are struggling with to your Study Book for review at any time using Flash Card style review sessions.

If you don't want to create the exams yourself then you are free to check the public exams that other users have created.

By the way, if you master exams, or if other people master public exams that you have created, then you will get more credits to continue to use Acolyte Academy for free!
